Projects

The **Projects Subcommittee** focuses on hands-on quantum computing projects, spanning software, simulations, hardware, and scientific instrumentation. It provides a space for members to explore technical concepts and develop them into practical projects.

Academics

The **Academic Subcommittee** develops QuEST's educational curriculum, workshops, seminars, and learning materials. It works on structuring technical content and making quantum computing concepts accessible to students at different levels.

Business & Outreach

The **Business & Outreach Subcommittee** builds connections between QuEST and the wider quantum computing, technology, and research community. It focuses on industry engagement, partnerships, networking opportunities, and collaborations with other organisations.

Publicity

The **Publicity Subcommittee** manages QuEST's communications and public presence through graphics, writing, photography, and video content. It promotes the club's activities while documenting and sharing its events and work with the wider NTU community.
